

Quality Chickens

Herban Living Farm provides the highest quality, freshest chicken, locally raised for you and your family.

Our chickens are free-ranging on rotated pasture and fed an organic grain. They are free of all medications and any other additives. These happy chickens eat bugs, plants, seeds and all the things that real chickens on real pastures should eat.

Most of our chickens are sold by pre-order. We may do an early batch to be sold fresh frozen available at the farmstand.

We are also offering memberships to our organic POBA. For more information, please call.
